## Custom App Design

MagLoft

We can include several books per app and our clients can assign different prices to each book.

This is the page you see after you download the particular book from the shelf. Each new book can be custom designed and tailored.

The app is built in a way that allows readers to search different categories according to their preferences with ease.

Phaidon wanted us to integrate a map function that allows their readers to search different restaurants according to their current location.

< 🗎 i ★ 😚	Q
RESTAURANTS	A B
#	C
#FARSH >   Tverskoy, Moscow, Russia	E F G
